

What is a Full Service School?

Florida Statute 402.3026

States that the Board of Education and the Department of Health shall jointly establish full-service schools to serve students from schools that have a student population that has a high risk of needing medical and social services based on the results of the demographic evaluations. The Full Service schools must integrate the services of the Department of Health that are critical to the continuity-of-care process. The Department of Health shall provide services to these high-risk students through facilities established on the grounds of the school. The Department of Health professionals shall carry out their specialized services as an extension of the educational environment. Such services may include, without limitation, nutritional services, basic medical services, aid to dependent children, parenting skills, counseling for abused children, counseling for children at high risk for delinquent behavior and their parents and adult education.
