

Content Standard	<p>MAFS.6.RP Ratios and Proportional Relationships</p> <p>MAFS.6.RP.1 Understand ratio concepts and use ratio reasoning to solve problems.</p> <p>MAFS.6.RP.1.1 Understand the concept of a ratio and use ratio language to describe a ratio relationship between two quantities. <i>For example, “The ratio of wings to beaks in the bird house at the zoo was 2: 1, because for every 2 wings there was 1 beak.” “For every vote candidate A received, candidate C received nearly three votes.”</i></p>							
Assessment Limits	<p>Whole numbers should be used for the quantities. Ratios can be expressed as fractions, with “:” or with words. Units may be the same or different across the two quantities. Context itself does not determine the order. Limit use of percent to <i>MAFS.6.RP.1.3c</i>.</p>
