

Content Standard	<p><b>MAFS.6.RP Ratios and Proportional Relationships.</b></p> <p><b>MAFS.6.RP.1 Understand ratio concepts and use ratio reasoning to solve problems.</b></p> <p><b>MAFS.6.RP.1.3</b> Use ratio and rate reasoning to solve real-world and mathematical problems, e.g., by reasoning about tables of equivalent ratios, tape diagrams, double number line diagrams, or equations.</p> <p><b>MAFS.6.RP.1.3a</b> Make tables of equivalent ratios relating quantities with whole-number measurements, find missing values in the tables, and plot the pairs of values on the coordinate plane. Use tables to compare ratios.</p> <p><b>MAFS.6.RP.1.3b</b> Solve unit rate problems including those involving unit pricing and constant speed. <i>For example, if it took 7 hours to mow 4 lawns, then at that rate, how many lawns could be mowed in 35 hours? At what rate were lawns being mowed?</i></p> <p><b>MAFS.6.RP.1.3c</b> Find a percent of a quantity as a rate per 100 (e.g., 30% of a quantity means <math>\frac{30}{100}</math> times the quantity); solve problems involving finding the whole, given a part and the percent.</p> <p><b>MAFS.6.RP.1.3d</b> Use ratio reasoning to convert measurement units; manipulate and transform units appropriately when multiplying or dividing quantities.</p> <p><b>MAFS.6.RP.1.3e</b> Understand the concept of Pi as the ratio of the circumference of a circle to its diameter.</p>
Assessment Limits	<p>Rates can be expressed as fractions, with “:” or with words. Units may be the same or different across the two quantities. Percent found as a rate per 100. Quadrant I only for <i>MAFS.6.RP.1.3a</i>.</p>
Calculator	No
