|  | <b>MAFS.8.G.1.3</b> Describe the effect of dilations, translations, rotations, and reflections on two-dimensional figures using coordinates. |                   |
|  |  |                   |
| Assessment Limits Coordinate values of $x$ and $y$ must be integers.                                       |  |                   |
|  | The number of transformations should be no more than two. Dilations must be about the center.  |                   |
