

Content Standard	<p>MAFS.3.G Geometry</p> <p>MAFS.3.G.1 Reason with shapes and their attributes.</p> <p>MAFS.3.G.1.1 Understand that shapes in different categories (e.g., rhombuses, rectangles, and others) may share attributes (e.g., having four sides), and that the shared attributes can define a larger category (e.g., quadrilaterals). Recognize rhombuses, rectangles, and squares as examples of quadrilaterals, and draw examples of quadrilaterals that do not belong to any of these subcategories.</p>	
Assessment Limits	<p>Shapes may include two dimensional shapes and the following quadrilaterals in particular: rhombus, rectangle, square, parallelogram, trapezoid.</p> <p>Attributes include: number of sides, number of angles, whether the shape has a right angle, whether the sides are the same length, whether the sides are straight lines. Do not include references to parallel or perpendicular sides — this is assessed in grade 4.</p>	
Calculator	No	
Acceptable Response Mechanisms	<p>Graphic Response – Drawing/Graphing</p> <p>Matching Item Response</p> <p>Multi-Select Response</p> <p>Multiple Choice Response</p> <p>Natural Language Response</p>	
Context	No context	
Example		
Context	A set of shapes is shown.	
Context easier	Decrease the number of shapes to 1-2, include only traditional orientation.	
Context more difficult	Increase the number of shapes to 5-6, include all shapes in nontraditional orientation.	
Sample Item Stem	Response Mechanism	Notes, Comments
<p>A square and a trapezoid are shown below.</p> <div style="text-align: center;">  </div> <p>Which properties do these shapes have in common?</p>	Multi-Select Response	

<p>A set of shapes is shown.</p>  <p>Which properties do they have in common?</p>	<p>Multi-Select Response</p>										
<p>Select the shapes that are quadrilaterals and not rectangles.</p> <ul style="list-style-type: none"> <input type="radio"/> Rhombus <input type="radio"/> Parallelogram <input type="radio"/> Triangle <input type="radio"/> Trapezoid <input type="radio"/> Square 	<p>Multi-Select Response</p>										
<p>Select the shapes that have one right angle, sides of different lengths, not rectangles, and quadrilaterals.</p> <ul style="list-style-type: none"> <input type="radio"/> Rhombus <input type="radio"/> Parallelogram <input type="radio"/> Triangle <input type="radio"/> Trapezoid <input type="radio"/> Square 	<p>Multi-Select Response</p>										
<p>Draw a quadrilateral that is not a rectangle.</p>	<p>Graphing Response – Drawing/Graphing</p>										
<p>Draw a quadrilateral with - one right angle, and - 2 sides of the same length.</p>	<p>Graphing Response – Drawing/Graphing</p>										
<p>What is the name of a shape that is - a quadrilateral, and - not a rectangle?</p>	<p>Multiple Choice Response</p>										
<p>For each shape, select the properties that apply.</p> <table border="1" data-bbox="191 1642 633 1902"> <tr> <td></td> <td></td> <td></td> </tr> <tr> <td>has four sides</td> <td></td> <td></td> </tr> <tr> <td>has two pairs of parallel sides</td> <td></td> <td></td> </tr> </table>				has four sides			has two pairs of parallel sides			<p>Matching Item Response</p>	<p>Including 2 shapes and 2 properties makes it an easy item.</p> <p>Classifying shapes based on properties determines DOK2.</p>
											
has four sides											
has two pairs of parallel sides											

<p>A group of shapes was sorted into two groups.</p> <p>Group 1</p>  <p>Group 2</p>  <p>Explain a rule that could have been used to group the shapes this way.</p>	<p>Natural Language Response</p>
