

Hello Students!

You have a **special opportunity** to let us know what you think! As a student in a Florida public district or charter school, your experiences and opinions are really important to us. The Florida Department of Education has a unique opportunity this summer to take a deep look at career and technical education as it is offered in the State of Florida, and as a current student in the public school system, **your insights are needed.**

A short survey has been designed that will take you at most 10 minutes to complete. Specifically, this survey will take a look at your participation, experiences, and opinions on career and technical education programs like culinary arts, manufacturing, digital technologies and more.

Your responses will remain absolutely confidential. Your name or identifying information will not be requested, and all the results will be analyzed in such a way that responses will not be linked to an individual.

Use the following link or use your cellphone to scan the QR code below:
